

MAXIMUM DEGREE OF SAFETY AT THE MAXIMUM OUTPUT

REMBE® Advanced Services + Solutions GmbH is specialized in the **commissioning, servicing, maintenance and repair of equipment with safety functions, safety-related fittings, devices and autonomous explosion protection systems** in industry.

Regularly recurring inspections, in particular of installations requiring monitoring, primarily **serve to maintain the safety of employees as well as protection of the environment and material assets.**

Preventive service also makes a contribution with regards to ensuring the operational added value of a company.

However, should there be a need to conduct an unexpected repair as a result of an occurrence, REMBE® Advanced Services + Solutions GmbH will carry out the required activities quickly and unbureaucratically. **„Our aim is to keep your processes running smoothly. Therefore, we will support you at anytime to get your facility up and running!** With more than 3 decades of experience in the service field, our team is ideally equipped to respond to service calls around the clock,” says Nikolaus Dückmann, Managing Director of REMBE® Advanced Services + Solutions GmbH.

“A full access to the warehouses of manufacturers such as REMBE® GmbH Safety + Control means that our service specialists can be deployed immediately.” Each service employee is qualified **compliant with SCC document 018**, and is authorized by the respective manufacturers such as REMBE®, RICO, Thorwesten or GTE /Adicos to commission, service maintain and repair certain systems.

REMBE® Advanced Services + Solutions GmbH offers an **all-round carefree package** for both smaller retrofits and large-scale projects, where even **complete turnkey safety concepts can be provided.** This also includes other system components such as rotary valves. Only a truly holistic concept from a single source can guarantee the proper functionality of the protective measures, as well as the optimally coordinated performance of your systems.
